

Information for parents and guardians about the BOaktiv process

BOaktiv

A proven process for identifying interdisciplinary skills in students

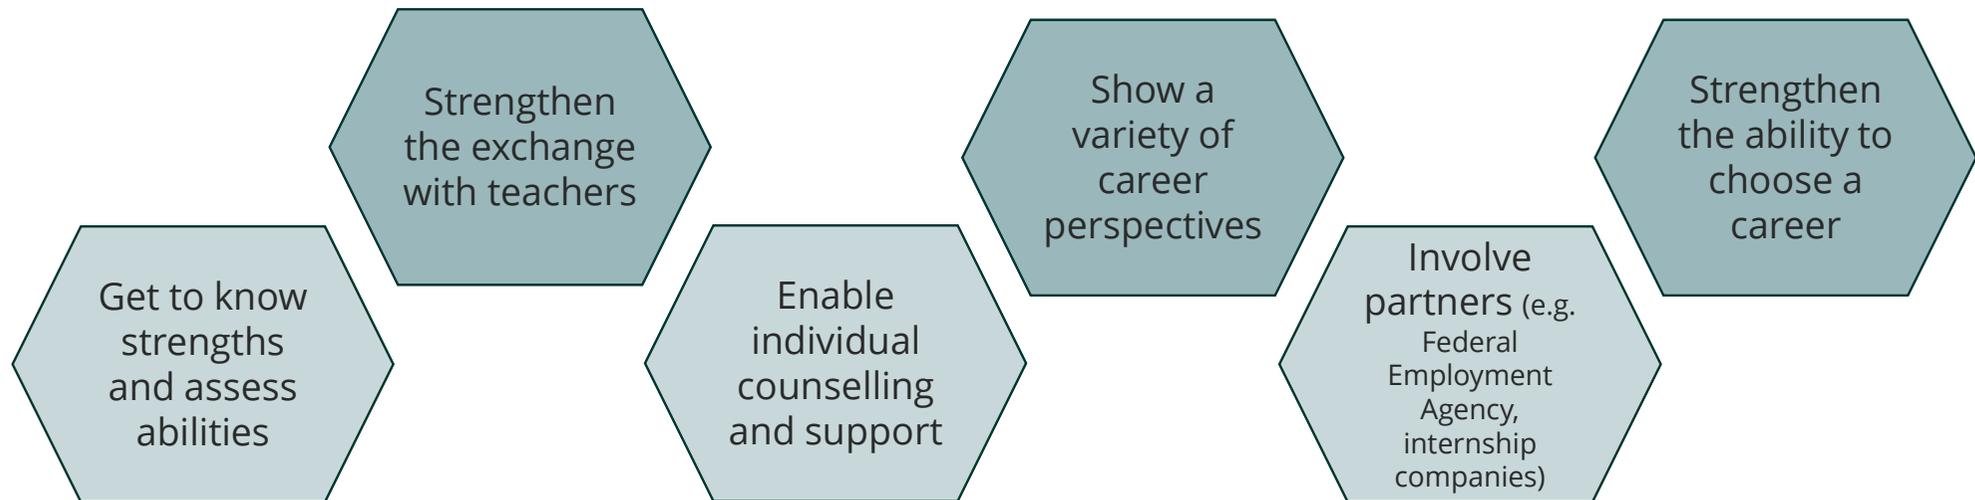

- ▶ BOaktiv is a proven process for identifying interdisciplinary skills in students.
- ▶ Your child is seen as an expert in his or her own development and is actively involved in the career exploration process.
- ▶ This strengthens your child's development and prepares them for their career choice.

Where and when is *BOaktiv* used?

- ▶ *BOaktiv* is a further development of the school-specific competency analysis Profil AC (in use in Baden-Württemberg since 2008) into a cross-school concept.
- ▶ *BOaktiv* is used in general and vocational schools in Baden-Württemberg.
- ▶ The procedure can be used from the 5th grade and supports your child until the transition to an apprenticeship or university.

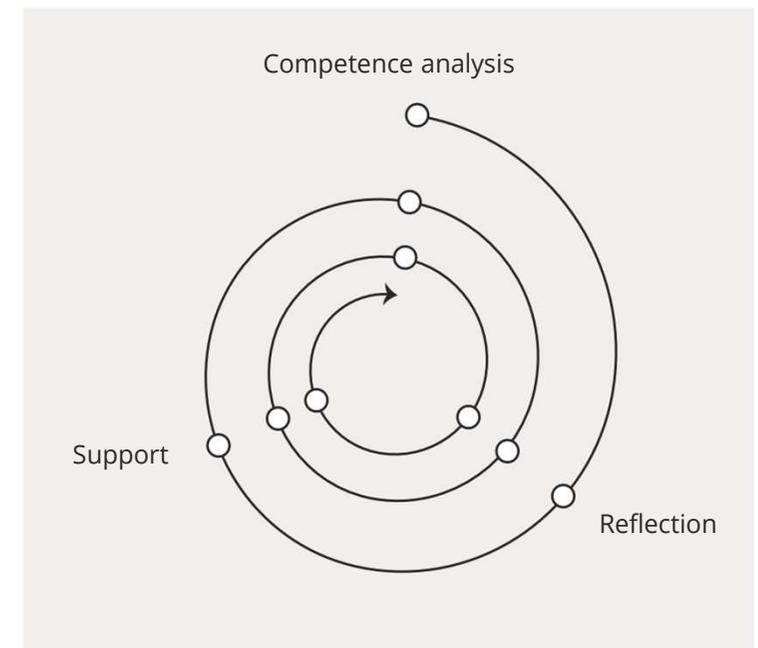

Goals - Benefits - Opportunities

Competence analysis, reflection and support

...form a continuous, holistic, spiral process:

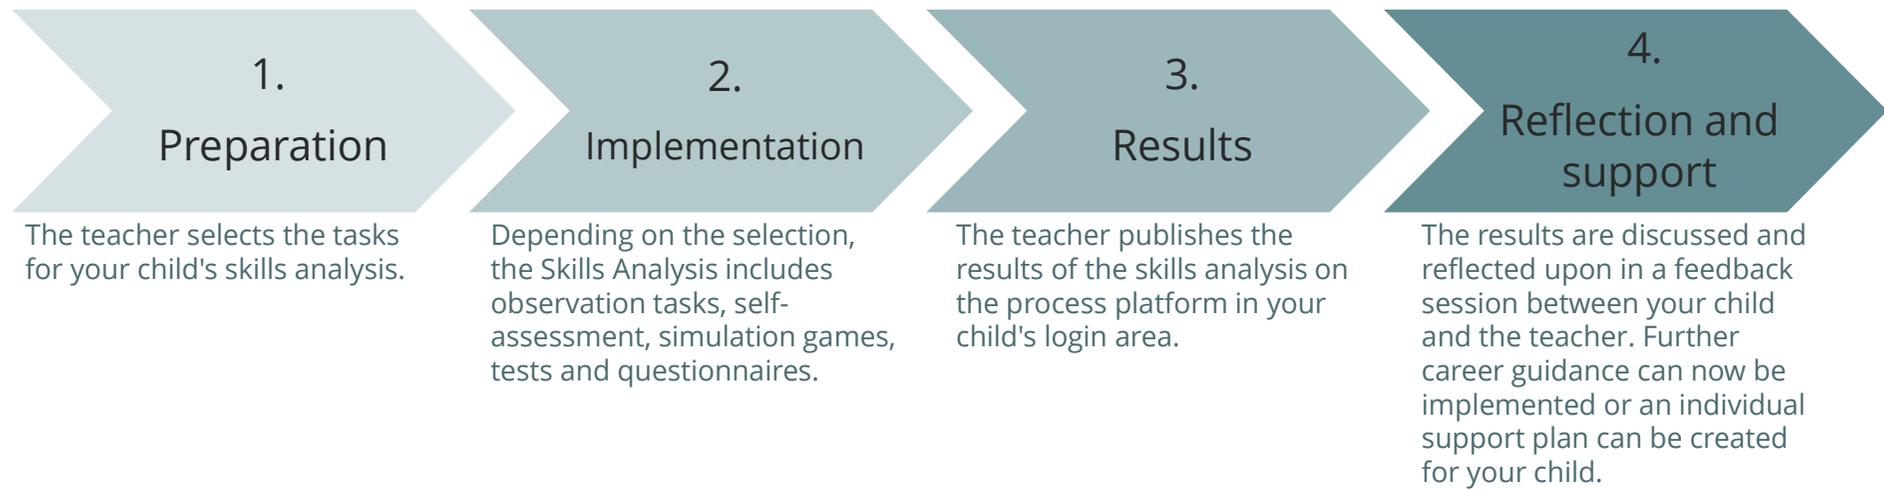

- ▶ **Competence analysis:** Identifies your child's skills and interests regardless of grade level or subject
- ▶ **Reflection:** helps your child identify strengths and consider them when choosing a career.
- ▶ **Support:** Works with your child's teacher to create a personal development plan.

What skills are assessed and how?

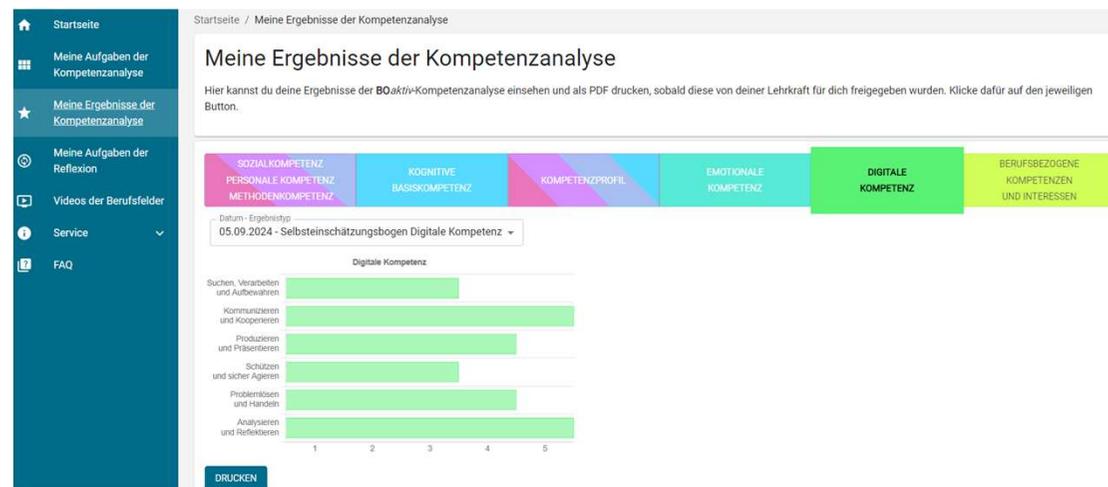

Skills	Feature (Example)	Assessed through
Social Skills	How well does your child work in a team?	Observation tasks, simulation games
Personal Skills	How independent is your child?	Observation tasks, simulation games
Methodological Skills	How well does your child solve problems?	Observation tasks, simulation games
Basic Cognitive Skills	How well can your child concentrate?	Tests
Emotional Skills	How well does your child control his or her emotions?	Questionnaire
Digital Skills	How well can your child navigate the digital world?	Tests
Vocational Skills and Interests	What skills does your child have in relation to certain occupational areas (e.g., technical skills)?	Tests, Questionnaire

How does the skills analysis work exactly?

Results of the skills analysis

- ▶ Your child has a personal access (login) to BOaktiv.
- ▶ In his or her personal login, your child will be able to view his or her results, get information for career and study choices, and work on assignments.
- ▶ Extract from a student's results:

How does the feedback session work?

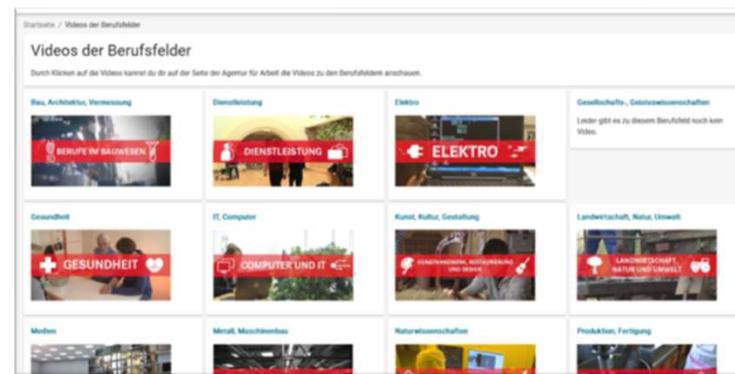

- ▶ The teacher will have a feedback session with your child about the results, during which your child will reflect on the results independently.
- ▶ Together, they will consider how best to provide guidance and support in the context of career orientation: What support does your child need at what point? What can your child work on independently? What are the next steps in the VO?
- ▶ The results of the interview will be recorded in an individual support plan or used for further VO measures.
- ▶ Privacy Notice: The results of the individualized support will only be shared if you, as the parent or legal guardian, do not object.
- ▶ You will have the opportunity to participate in the feedback discussion. Ask your child's teacher.

What can you do?

- ▶ Talk to your child about BOaktiv and his or her strengths!
- ▶ Let your child show you the different areas in his BOaktiv login, e.g. the results of the skills analysis, the support planning or your child's network.

- ▶ Watch videos with your child about different career fields.
